'EUML' Aluminium Terminations

Principle Application:

Termination of circular stranded aluminium or copper conductors for all cable voltages up to and including 42kV.

Material: Aluminium Alloy (Electro-Tinned)

Test Specification: BS EN 61238-Class A

Test Report No: TTR/345

Fitting instructions:

1. Strip insulation from the core equal to the depth of the bore.
2. Wire brush the exposed conductor cores and wipe clean (optional).
3. Fit the appropriate sized cable centralising ring (if required).
*** NOTE:** Not required for LV cable cores.
4. Align and position the conductor core in the bore ensuring that the core is fully inserted.
5. Fit the universal shear screws within the connector and torque tighten one turn at a time, using the correct socket, until the bolts have sheared.
